General Education Interventions and Strategies for English Learners (ELs)

Student	Grade	School Year
Building	Teacher(s)	

The following is a list of interventions and strategies that may be used as a means of individualizing and assisting an EL in the general education classroom. This list is not meant to be exhaustive and additional strategies and interventions should be explored. Each intervention should be implemented for a period of no fewer than six weeks to no more than twelve weeks (Collier, 2011). Attach copies of the strategies used, where applicable. This document may be useful in guiding the discussion of child study teams relative to the pre-referral process for an EL suspected of having additional learning needs beyond those which present typically during the second language acquisition process.
